More to come – Aedas wins Medal of the Year of Hong Kong!

Since April this year, Aedas has won multiple design awards. The latest addition is the Medal of the Year of Hong Kong, the highest honor of all award categories given by the Hong Kong Institute of Architects (HKIA) to the Revitalisation Project at Mallory Street/Burrows Street in Wan Chai, Hong Kong, at HKA Annual Awards 2013. The project also wins Special Architectural Award – Heritage and Adaptive Reuse. Results were announced on 10 June 2014 and the award ceremony was held three days later.

Restoration and adaptive reuse allow the urban landscape to develop progressively, maintain community history and memory, add to the urban cultural strength, strengthen sense of place and time and conserve carbon. This notable piece of architectural adaptive reuse and restoration conserves a rare and intact shophouse ensemble and improves the urban environment and the community.

Aedas has designed different adaptive reuse projects in Hong Kong and China such as the Prince’s Building, the community centre, and Revitalisation Project at Mallory Street/Burrows Street in Wan Chai, Hong Kong, the highest honour of all award categories given by the Hong Kong Institute of Architects (HKIA) to the<br>

Aedas, as Design and Documentation Architect, revived the traditional architectural fabric for modern cultural, leisure and commercial use with a design concept that respects historical features, considered urban needs, and improve indoor environment and renovate to comply with current building regulations based on the programme requirements set by client and project manager Urban Renewal Authority and in collaboration with consultants. This project also won the Special Architectural Award – Heritage and Adaptive Reuse. Results were announced on 10 June 2014 and the award ceremony was held three days later.
